

SAP Business Process Analyst

Varian Medical Systems, Inc. (VMS) is on its way to "Best-In-Class" processes and has an opening for a "SAP Business Process Analyst" within the supply chain management environment.

Scope:

Utilizing SAP functionality, this analyst aggressively plans, performs and implements process improvement initiatives leading to a lean environment. Diagrams, evaluates, and re-engineers existing processes. Organizes, leads and facilitates cross-functional project teams. Develops metrics that provide data for process measurement, identifying indicators for future improvement opportunities. Collects data to identify root cause of problems. Surveys and analyzes best practices for techniques and processes. Communicates team plans & progress through written and oral presentations. Performs cost and benefit analysis. Trains user personnel in the use of SAP to create subject matter experts. Creates SAP training documentation. Translates user requirements into enterprise-wide SAP-based systems. Creates user reports and queries.

This is a challenging position, and as such, in addition to outstanding initiative, communication skills, and the ability to effectively multi-task in a team-oriented manufacturing environment, the successful candidate must be an achiever, will have a bachelor's degree (or higher) with expert-level experience in SAP, Excel, PowerPoint, MS-Outlook, and Word. Analytical and problem solving skills are a must. This is a business process improvement position that requires an SAP background.

If you would like to utilize your talent to its fullest extent, helping build products that save people's lives, in an environment that rewards initiative, motivation, and commitment, this position could lead to other opportunities within the organization as a whole.

Minimum Required Skills and Knowledge:

Expert in utilizing business tools such as: Outlook, Word, Excel, and PowerPoint.
Expert in SAP-based ERP system.

Typical Education and Experience:

Bachelors degree and 8 years of related experience or Masters Degree (preferred) with 4 years of related experience.

Demonstrated analytical and problem-solving experiences. The successful candidate will possess initiative with proven results.
